COARSE GRAINS ARE HIGHER

WEAVY INCREASE IN VISIBLE SUP-PLY KNOCKED OUT WHEAT.

Wheat Lost 3-Sc, Corn and Oats Closed Strong at 1-4c Advance and Provisions Advanced From 7 1-2 to 15c.

CHICAGO, Dec. 12.-Coarse grains and provisions were strong to-day, and closed higher, while wheat, though starting in the direction of higher prices, turned w closed at 140% decline from Saturday's final figures. The heavy increase in the visible was the club that knocked the props from under the market. Corn and oats were strong for no apparent reason, and advanced about 4c each. Provisions were in better demand, and closed

It looked at the start as if wheat was to be another bull market. The world's shipment figures were very encouraging to buyers, showing a total of but \$,500,000 bushels, as against \$,844,000 bushels were shipped from this side. The feature which attracted the most attention, however, was the remarkably small Russian shipments—only \$16,000 bushels. This fact, coupled with the reports of the scarcity in some provinces of Russia, suggested a possible dropping out of that country as a competitor of America, for the present at least, and gave a good feeling of stiffness to the early trading. Liverpool also showed firmness, \$46346 advances being chronicled in that market. May started a shade higher, at \$5546655c. There was quite a good demand at those figures, both from shorts and from the general crowd, the result being an immediate advance to \$55c. The demand was soon satisfied, and for a short time the market was extremely dull, though steady. Then it turned weak, and remained in that condition until shortly before the close, only the narrowness of trading preventing a more serious decline than occurred. Private London cablegrams, saying that Russian offerings were increasing, was the first wave that struck the sand house of the bulls. Soon after this the figures on the world's visible were posted. They showed an increase of \$263,000 bushels, an amount so far beyond even what the most pessimistic bear had expected, that all the wheat bought during the early trading, and considerably more besides, was dumifed onto the market. Before the liquidation ceased, May had dropped to \$5c. and even at that price there was very little bidding for some time. Primary receipts were 1,52,000 bushels. Minneapolis and Duluth receipts were 1,62 cars, compared with 1,647 cars last week. and 1,244 a year ago. Chicago receipts were 255 cars, six of contract grade. Argentine and Indian crop news was favorable. The export demand was rather slack, New York reporting from twenty to thirty loads taken for export. Near the close covering by 71-915c higher. It looked at the start as if wheat was to be another bull market. The world's

Oats were even duller than corn. Trading was very parrow all day and chiefly of a scalping nature. The market in a general way followed corn and ruled rather firm throughout at a slight advance. The cash market was easy, due to liberal receipts—500 cars. The visible decreased 183,000 bushels. May ranged from 25% to 26% and closed 467% higher at 2622%. Provisions were firm from the start. Commission houses were well supplied with buying orders and the local crowd was decidedly bullish on the belief that a bull campaign was on. Packers sold sparingly, notwithstanding large hog receipts. The market closed firm at about top figures. May pork 15c higher at \$3.70. May lard 12% higher at \$4.90.

610c higher at \$4.90. and May ribs 714c Estimated receipts Tuesday: Wheat, 210 cars; corn, 760 cars; oats, 470 cars; hogs, 37,000 head.

A circular on flaxseed, used by a Chicago firm, shows that the receipts of seed at Duluth, Minneapolis and Chicago for four months, August 1 to December 1, were 11,145,000 bushels, or 1.595,000 bushels more than for the same months in 1857. The stocks of seed at Duluth, Minneapolis and Chicago in public houses December 1 were only 1.485,000 bushels, or 576,000 bushels less than the stocks at these same points list year. They estimate the probable seed receipts from December 1 to August 1, 1899, the balance of the crop year, at 2,009,000 bushels. The available crop, judging from the movement, they put at 15,748,000 bushels, exclusive of seed requirements. The exports have been 2,500,000 bushels.

While there was a want of life to the local money market yesterday, there was still some general demand and volume of loans much the same as usual this time of year. But as collections are good and the banks are now gaining currency from the country, the supply of available funds on hand is large and the situation at the banks decidedly easy. But while plenty of money is to be had by people of standing, the rate of discount is still held at '93 per cent. Shipments of currency to the country are light. NEW YORK, Dec. 12.—Stocks made very material progress to-day in the present upward movement and left off buoyant with advances in standard stocks ranging from 1 to 3 points, while this rise was exceeded in many less prominent issues, notably Pullman, Third Avenue and Edison Illuminating. Transactions for the day in stocks and bonds were of an enormous scale, immense blocks of securities changing hands at rising figures. Early quotations were in strong sympathy with London, where there was a scramble for stocks even after the closing there for the new account which opens to-morrow. Commission houses were in receipt of many orders to buy at the market and the volume of business offset frequent efforts to depress values. Reports of traffic earnings for the first week in December were almost uniformly favorable as were several belated November statements of gross carnings. An incident exerting favorable effect was the receipt of over \$3,00,000 in gold from France and London. The immediate demand for bonds, in which the transactions to-day reached over \$5,000,000, seried a favorable influence in stocks as did a tendency to discount January dividend disbursements. Atchison preferred on transactions of 150,000 shares went up 3%c. The heavy purchases were made by brokers identified with prominent interests active in other properties. The drift of speculative activity in the grangers was interpreted favorably. High priced investment stocks like the grangers. Great Northern preferred, Pullman, New Haven & Hartford and Albany & Susquehanna rose sharply. Excepting Sugar, the industrials tended upward. New York Central's price crossed that of Pennsylvania. The coalers, on favorable trade outlook, were conspicuous for advances. General Electric responded to reports of sales of its product abroad. The Pacific overstrong with the rest of the market, Northern Pacific overscoming the early heaviness due to the reports that the company favored extensions into Oregon Navigation Company territory.

Not many in yesterday and the markets east of us being strong caused a better feeling in good catter. No choice native steers in. What few toppy ones on sale brought about 10c more money and fair fleshed was rather firm. But toward the close most of the early strength was lost. Not many cows in, yet as the demand was light prices were unimproved. Stockers and feeders, as usual on Monday, were very quiet and prices ranged only steady. Range cattle were in only moderate supply. In the native division the best killing steers were strong at the opening, but toward the close the feeling became weaker. In the Texas division sales were slow and prices barety steady. Not many in or prices would have been lower. Milch cows, when choice, in fair demand, but low grades dull. Common, 115471s medium to fair, \$25672.50; good to choice, \$35679.

A fairly active and steady to firm market was had yesterday. The fresh receipts were only moderate, but with the holdovers the supply was very good, yet they were all wanted. Killing grades of sheep and fat lambs sold without trouble and stockers and feeders were in very good request and brought firm prices, and a clearance was made without trouble.

FEEDING RANGE COLTS-AN EXPER IMENT UNDER WAY IN IOWA.

A Blizzard in Texas-Loss in St. Louis Texas Cattle Trade-More Active Movement of Cattle East-In With Stock.

AMES, IA., Dec. 12.-C. F. Curtiss, of the agricultural college of Iowa, says: We have an interesting experiment with range colts under way. We have nineteen weanlings and six yearlings obtained from the Continental Coach Horse Company's ranch, in Southeastern Montana, and the P. O. ranch, near Cheyenne, Wyo. They arrived at the station early in November

P. O. ranch, near Cheyenne, Wyo. They arrived at the station early in November and stood the long journey surprisingly well. Not a single colt of the entire lot had a blemish or even so much as a scratch; they came off from the cars in good condition, and have taken readily to their new surroundings. We began halter breaking the weanlings immediately, while they were yet wearied from their journey, and in less than a week they could be handled by the halter without difficulty. The yearlings we turned out to bluegrass pasture with only woodland for sheiter; they remained there until the recent snowfall, which covers the ground to a depth of six or eight inches at this place.

They are now being fed on corn stover and two pounds of grain per head daily, but have not yet been stabled or sheltered. The weanlings have passed safely through a siege of distemper since their arrival, but nearly all of them now present sleek thrifty coats, and they give promise of going on through the winter in a satisfactory manner. We hope to put them out on grass in strong, vigorous condition next summer and of good etze for their age.

One thing is particularly noticeable in all of this lot of colts; namely, their clean, sound limbs, good feet and entire freedom from all tendency to blemish. Care was taken to secure good representatives of the following blood lines: Grade Germancoach, French cosch, Percheron, Clydesdale and trotting bred. Arrangements have been made for a few Hackneys to be added later.

They already compare quite favorably with native bred stock of the same age, and many of them give promise of developing into some high class horses.

The San Antonio (Tex.) Express of Satur-The San Antonio (Tex.) Express of Saturday says:

The blizzard that struck the Southwest yesterday morning is the most severe for this season that has visited this country in years. That it will prove the death knell for many a young calf and old cow out on the ranges and will harvest a plentiful crop of hides is a foregone conclusion. To expect otherwise would be to hope against hope and to ignore facts and conditions as they are known to exist.

The shipments of stockers and feeders to the country last week were 35 cars against 478 cars the same week last year. Morris & Butt, who have again entered

the Mexican trade, shipped ten cars hogs to the City of Mexico last week. St. Louis is still falling behind in her Texas cattle trade. The receipts of quar-antine cattle there last week were 3% cars, against 433 the same week last year.

Kirby Smith, of Alexandria, La., was here yesterday after horses and mules. James and Harry Stephens brought in yesterday their thirty-two Christmas beeves, contracted some time back, to A. Weber, the butcher, at \$5.00 per hundred. They were not heavy, but a very even and choice lot of 2-year-olds. They comprised Red Polled, Galloways, Herefords and Dehorned Shorthorns, and all showed equal excellence. They were perfection beefiness and made a popular average of 1,355 pounds, not too heavy nor too light.

There was more doing here last week in shipping cattle East than for some time, there being sixty-five cars taken by that trade, against thirty-two cars the previous week and thirty-eight cars the same week last year.

Indianapolis, Ind., received 55,000 hogs last week, against 36,500 the same week last year.
